MEASURE YOUR SHOE SIZE AND WIDTH

How do you determine the right shoe size?

Look at the 4 images below (Fig. A, Fig. B, Fig. C, & Fig. D) to see where you need to measure the foot circumference, width and size. Measure these 4 measurements in millimetres and note them down for later use.

Go to the **size chart** and search in column 1 (Inside shoe length in millimetres) until you get to the closest measured length measurement. Next, search horizontally for the ball width closest to your measured ball width size. From this position, go up vertically to find the width size. If in doubt, also look for the closest ball width and low instep size. Now you have all the measurements needed to select the right Pedro® pair.

If you need any help or advice regarding the Pedro® size charts, please contact our customer service team on **0182 - 22 35 40** or **piedro@piedro.nl**. They are always happy to help you!
